

PORCELAIN
CARE & MAINTENANCE

TAKING CARE OF YOUR LAVISTONE PORCELAIN

Lavistone Porcelain exemplifies strength and naturalness. The unique character of the surfaces is created through the use of a variety of materials, enhanced by the large size of the slabs. Our range is able to satisfy all contemporary architectural needs, to furnish environments with refined and functional solutions, guaranteeing optimal planning and perfect styling conditions.

EVERYDAY CLEANING MADE SIMPLE

For optimal maintenance of your Lavistone Porcelain, simply remove spills by wiping the area, then clean the surface with a soft cloth and warm, soapy water for best results.

AVOID SCRATCHES

Lavistone Porcelain is engineered to withstand scratches. However, any forceful scratches can leave visible marks. Ceramic knives also have the potential to cause scratches on surfaces, regardless of the finish. This is similar to how they can scratch other surfaces within the same product category or even other categories.

NO FURTHER SEALANTS REQUIRED

Designed for long-lasting durability, your Lavistone Porcelain requires no additional sealants and can retain its pristine appearance for decades to come!

TOUGH BUT NOT INDESTRUCTIBLE

To avoid chipping, refrain from striking your countertop with a heavy and blunt object. The edges are particularly vulnerable to physical damage. It is recommended to maintain a mitred edge gap of 3-4mm.

EVERYDAY CLEANING & CARE

To keep your Lavistone Porcelain pristine and well-maintained for decades, proper care is essential. Incorporate these steps into your daily routine to ensure your surface stays in top condition:

- **Wipe Away Spills Immediately:** As soon as spills occur, wipe them away with a clean, dry cloth to prevent potential staining or residue buildup.
- **Clean the Surface:** Dampen a soft cloth or sponge with warm, soapy water and gently wipe down the entire surface, paying extra attention to any spills or stains.
- **Rinse with Water:** After cleaning, use a separate cloth dampened with clean water to remove any soap residue, ensuring a streak-free finish.
- **Avoid Abrasive Sponges or Cleaning Agents:** Never use abrasive scrubbers, steel wool, or harsh chemicals, as they can scratch or damage the surface. Use microfibre cloths and non-abrasive cleaners for the best results.
- **Avoid detergents containing additives such as waxes or polishing agents.** These substances can create an oily residue on the surface of your Lavistone Porcelain Surface after multiple washes.

1 Simply wipe away spills.

2 Use a clean cloth and warm soapy water to clean your Lavistone surfaces.

GREASY SPILLS on a Matt or Textured Surface

Matt and Textured finishes offer a muted, non-reflective look. However, when oil or grease comes into contact with the surface, reflective 'patches' may appear. Simply use a spray cleaner or warm, soapy water to degrease the surface, lifting away any oil or grease residue.

1 Simply wipe away with a paper towel.

2 Use warm, soapy water and a clean cloth to degrease any remaining oil spill. Then remove excess soap residue with paper towel.

STUBBORN STAINS

Stubborn stains may occur from spills of highly pigmented liquids, spills that have been left on the surface for an extended period, or dried-up residues.

To address these stains, follow these steps using our cream cleanser:

- 1** Wipe away residue with paper towel.

- 2** Pour a sufficient amount of Lavistone Cream cleanser on a damp non-scratch scrub and create foam lather.

- 3** Using circular motions, gently scrub on the stained surface and avoid excessive pressure.

- 4** Remove any excess soap residue with a clean cloth

LAVISTONE CREAM CLEANSER

Lavistone Cream Cleanser with micro particles is specially developed to maintain your stone surface, ensuring their optimal appearance and longevity.
